Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter is a direct replacement for the stock air filter, and no modifications will be required. However the following procedure **MUST** be followed to ensure a proper fit and seal of the air filter.

- 1) Remove the airbox lid.
- 2) Remove the filter element from the airbox base.
- 3) Wipe out any dust or dirt from the airbox with a damp rag.
- 4) Install the pre-oiled K&N Filtercharger into the airbox base, making sure that the two tabs on the K&N air filter are installed in the base so that they will be positioned on the same side as the two cut-outs on the airbox lid. (See fig. 1).
- 5) Place the airbox lid onto the airbox base and fasten the clips.

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.
