Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter can last many seasons. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N® air filter seals properly.

### INSTALLATION:

1. Remove the stock air filter from the air box. **NOTE: The K&N® air filter will utilize the OE hose clamp and holder.** Fig.1
2. Clean all sealing surfaces in the air box.
3. Remove the OE breather collar connected to the crank case vent hose and replace it with a K&N® supplied 90° vent. Fig. 2 & 3
4. Insert the K&N® supplied hose to the 90° coming from the crank case. Fig. 4
5. Insert the second K&N® 90° to the crank case vent hose. Insert crank case vent hose and 90° into the top of the K&N® air filter. Fig. 5 & 6
6. Install K&N® air filter into air box. Fig. 7
7. Reinstall holder and check fitment of 90° connected to the crank case breather. Fig. 8

**THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.**
