Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter can last many seasons. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N Filtercharger® seals properly.

### INSTALLATION:

1. Remove the stock filter. Clean any dirt or debris that may be present around the sealing flange of the air box.
2. Install K&N® air filter into air box. **Fig. 1** Filter will only fit in one direction. Make sure the tab on top plate sits correctly onto the post inside air box.
3. Install fastener into tab on top of filter and tighten. **Fig.2**
4. With filter seated correctly, tighten hose clamp.
5. Re-install the air box lid.

**THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.**
